<p>Functional Testing (Library Construction, RNA) Each set of reagents is functionally validated and compared to a previous lot through construction of libraries made from commercially available RNA, using the kit's minimum and maximum input requirements. Libraries made from previous and current lots for both input RNA amounts are sequenced together on the same Illumina® flow cell and compared across various metrics including library yield, individual transcript abundance correlations (low vs. high input, old lot vs. new lot), 5'-3' transcript coverage, and fraction of reads mapping to a reference.</p> <p>* Individual Product Component Note Standard Quality Control Tests are performed for each component included in NEBNext® Ultra™ Directional RNA Library Prep Kit for Illumina® and meet the designated</p>	<p>Pass</p> <p>Pass</p>
